PROFESSIONAL SUMMARY

Cloud Infrastructure, DevOps, and Platform Engineer with 5+ years of experience designing, automating, and operating secure Azure and hybrid cloud environments. Skilled in Terraform, Infrastructure as Code (IaC), Azure DevOps, GitHub Actions, Kubernetes (AKS), CI/CD, Azure Landing Zones, Azure Policy, Azure Monitor, Git, and identity governance using Microsoft Entra ID, RBAC, and Conditional Access.

Experienced in owning infrastructure delivery, cloud governance, automation, and platform reliability initiatives that improve deployment speed, security, compliance, and operational efficiency. Reduced deployment times by 60% through Infrastructure as Code and automated delivery pipelines while supporting scalable and resilient cloud operations.

CORE SKILLS

DevOps & Automation Terraform, GitHub Actions, Azure DevOps, Jenkins, ArgoCD, Git, YAML, PowerShell, Python, Bash.	Cloud Platform & Governance Azure, AWS, Azure Policy, Cost Management, Governance, Azure Landing Zones, IAM	Containers & Orchestration Kubernetes, Helm, Docker, Container Security, Vulnerability Scanning, Isolated Runtime Configurations.
Identity, Security & Compliance Microsoft Entra ID (Azure AD), Conditional Access, IAM, ISO 27001- Aligned Compliance Controls, Network Security Group & RBAC	Observability & Monitoring Azure Monitor, Log Analytics, Grafana, Prometheus, ServiceNow.	Systems, Networking & Scripting Windows Server (AD DS, DNS, DHCP, GPO), Linux, Hyper-V, Proxmox, TCP/IP, VPN, firewalls/load balancers, PowerShell, Python, Bash

PROFESSIONAL EXPERIENCE

ABC of Cloud Computing , <i>Cloud Infrastructure & DevOps Engineer</i>	12/2024 – Present United States (Remote)
- Built and maintained CI/CD pipelines using Azure DevOps, Git, GitHub Actions, Terraform, and Kubernetes (AKS) to automate Azure infrastructure deployments. Implemented automated validation (Terraform fmt, validate, and plan) and monitoring with Azure Monitor and Grafana, reducing deployment times by 60%. - Developed reusable Terraform modules to provision and manage over 150 Azure resources across development, staging, and production environments. Implemented remote state management, state locking, and automated deployment workflows to improve consistency and reduce configuration drift. - Implemented security and governance controls using RBAC, Conditional Access, and Azure Policy, reducing audit findings by 40% and supporting compliance requirements across cloud environments. - Collaborated with product owners, software engineers, and project managers to gather requirements, troubleshoot issues, and deliver secure and reliable cloud solutions. - Managed AKS clusters supporting containerized workloads, configuring ingress, monitoring, workload identity, and cluster upgrades to improve platform reliability and operational efficiency.	
Dignus Group Limited (UK) , <i>Cloud Support/Sys Administrator</i>	05/2024 – 07/2025 United Kingdom
- Built and maintained enterprise Azure, Windows Server, and Active Directory environments to support business operations, improving system reliability and enabling standardized identity management. - Automated administrative and operational tasks using PowerShell and Bash, improved user provisioning, reporting, and patch management, and reduced manual workload by 40%. - Supported day-to-day infrastructure operations, troubleshooting production issues, managing system reliability, and maintaining operational stability across business-critical systems.	
54Gene Nig. Ltd , <i>Cloud Support Engineer</i>	09/2022 – 04/2024 Nigeria
- Built GitHub Actions CI/CD workflows to automate container image builds, security checks, and Terraform deployments, reducing manual release effort by 45%. - Reviewed and optimized Azure and AWS cloud resources, removing unused storage, orphaned IP addresses, and over-provisioned compute resources, reducing monthly cloud costs by 25%. - Implemented IAM policies, RBAC, and least-privilege access controls to improve security and reduce unauthorized access risks. - Automated configuration management using PowerShell and Bash scripts, improving consistency across hybrid environments and supporting compliance with internal security standards.	

- ICM Capital Ltd, IT Administrator

08/2021 – 09/2022 | Abuja, Nigeria

 - Implemented business continuity and disaster recovery (BCDR) solutions using Hyper-V replication and automated backups, reducing Recovery Time Objective (RTO) to under 3 hours for critical systems.
 - Automated server patching and updates using WSUS and PowerShell, reducing patch deployment times by 40% and improving security across the environment.
 - Managed Active Directory, Group Policy (GPO), and Conditional Access policies to strengthen identity and access management for over 100 users.
 - Configured monitoring, alerting, and diagnostic solutions for critical systems, enabling proactive issue detection and reducing service disruptions.
- Ngonyama Okpanum & Associates, IT Administrator (Cloud)

12/2020 – 07/2021 | Nigeria

 - Implemented hybrid cloud infrastructure using Azure and on-prem Windows Server to improve reliability and scalability, reducing system downtime by 20%.

KEY PROJECTS

- Terraform IaC Modules, AKS GitOps & Automated CI/CD Platform

, Terraform | Kubernetes | Git | Bash | ArgoCD

 - Developed reusable Terraform modules and declarative Kubernetes configuration to standardize infrastructure deployments across development, staging, and production environments.
 - Implemented GitOps workflows using GitHub Actions, ArgoCD, and Git pull requests as the approval mechanism for infrastructure changes, improving governance and deployment consistency.
 - Eliminated manual infrastructure changes and reduced deployment times by 60% through Infrastructure as Code and automated CI/CD pipelines.
- CloudOps Goal Tracker - Three-Tier Architecture

, Azure VMSS | GitHub Actions | Docker

 - Designed and deployed a multi-subscription Azure Landing Zone using Terraform, implementing Azure governance, security controls, and resource standards aligned with the Microsoft Cloud Adoption Framework (CAF).
 - Built GitHub Actions CI/CD pipelines for Terraform deployments, incorporating automated validation, approval workflows, and branch protection policies, reducing manual deployment effort by 40%.
 - Deployed and managed a three-tier application architecture using Azure VM Scale Sets, Docker, Azure Monitor, and automated deployment workflows, improving scalability, operational visibility, and infrastructure reliability.
- Docker Microservices Platform & Container Hardening,

Docker | Linux | CI/CD

 - Built and deployed containerized applications using Docker multi-stage builds, reducing image sizes by 40% and improving deployment efficiency across environments.
 - Implemented automated vulnerability scanning within CI/CD pipelines to detect and address security issues before deployment, strengthening container security and supporting secure software delivery.
- Automation & Monitoring,

Python | Bash | Azure Monitor | Grafana

 - Built and maintained Python and Bash automation solutions integrated with Azure Monitor, Prometheus, Grafana, and Log Analytics, improving monitoring, alerting, and operational visibility while reducing incident resolution times by 35%.

CERTIFICATIONS PROFILES

Core Certifications	Microsoft Applied Skills	Other Training
- Kubernetes and Cloud Native Associate (KCNA) - Microsoft Certified Azure Solutions Architect Expert (AZ-305) - Microsoft Certified Azure Network Engineer Associate (AZ-700) - Microsoft Certified Azure Administrator Associate (AZ-104)	- Active Directory Domain Services - Deploy and Configure Azure Monitor - Secure Storage for Azure Files & Blob Storage - Azure Management Tasks - Identities and Access using Microsoft Entra - Resolve GitHub issues by using GitHub Copilot - Deploy cloud-native apps using Azure Container Apps	- Microsoft Power Up Program - Power Platform (Power Apps, Power Automate, Power BI) - CS50: Introduction to Computer Science, HarvardX

EDUCATION AND CERTIFICATES

Diploma, Computer Engineering, Silver Training Group DigiHub Technology Solutions, Nigeria	12/2018 – 11/2019
HND, Management, Abia State University, Nigeria	01/2013 – 11/2018
